

Yuhei Nozoe

Senior Manager, Kyoto Fusioneering Ltd.

Co-CEO, Fusion Fuel Cycles Inc.

Yuhei Nozoe, a dynamic business leader with a proven record of driving revenue growth, has led strategic planning efforts and key negotiations in major markets, including Europe, Japan and North America since joining Kyoto Fusioneering (KF) in October 2023. He has overseen the business development for fusion plant technology, including the launch of an international joint venture.

Through his stewardship, Fusion Fuel Cycles Inc (FFC), the joint venture with Canadian Nuclear Laboratories, is developing cutting-edge fusion technology, which will lead to significant revenue growth.

Yuhei's expertise extends to intellectual property management, supply chain strategy, and business development to strengthen KF's and FFC's position in the global market. He brings over a decade of experience in global business development and large-scale deal making in the energy and technology sectors to his current role at KF.

Expanding Global Business Opportunities for Fusion Engineering Technology

Through his roles at KF and FFC, Yuhei leads business development for key projects, including our two UNITY projects that demonstrate the fusion thermal cycle and fusion fuel cycle systems.

His expertise spans project management, supply chain management, and R&D support. He focuses on optimizing efficiency, cost, and speed for our engineering teams while ensuring effective communication with suppliers and customers, making him a vital player in driving fusion technology forward.
